PROFESSIONAL SUMMARY

Engineering student with hands-on experience building and deploying full-stack web applications using Python, Flask, FastAPI, and JavaScript. Delivered production-ready SaaS-style projects spanning AI inference, cybersecurity, and data analytics with a focus on clean, maintainable code. Experienced in REST API design, debugging, and end-to-end system ownership. Collaborative and quick to learn, eager to contribute to live product features and end-to-end product development lifecycle in a fast-paced environment.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, C++
- **Frontend:** HTML5, CSS3, JavaScript, Angular
- **Backend:** Flask, FastAPI, Node.js, PostgreSQL, MongoDB, REST APIs
- **Debugging & Tools:** Log Analysis, Postman, Monitoring, Git, GitHub, Vercel, Docker
- **Practices:** Agile/Scrum, Code Review, Automated Testing, Best Practices in Software Development
- **CS Fundamentals:** Algorithms & Data Structures, OOP, DBMS, System Design
- **Problem Solving:** Analytical Thinking, Debugging, Application Performance Optimization

PROJECT EXPERIENCE

AI Resume Screening System | GITHUB

Python | Flask | Groq API (Llama 3.3 70B) | HTML5 | CSS3 | Vercel

- Designed prompt workflows for LLM-based resume evaluation across 10+ formats, delivering consistent output for skill gap analysis and hiring recommendations
- Implemented a scoring system (0–100) ranking candidates into three tiers, reducing manual screening effort by 70%
- Constructed a PDF parsing pipeline using PyPDF2 to extract and normalize unstructured data from concurrent uploads
- Identified and resolved 15+ API endpoint failures via Postman and log-based debugging, eliminating response inconsistencies across all endpoints
- Deployed a full-stack web application on Vercel, cutting inference latency to under 10 seconds

AI-Powered Phishing URL Detection & Threat Intelligence System | GITHUB

FastAPI | Cybersecurity | Chrome Extension

- Architected a FastAPI backend returning real-time threat classifications in under 200ms, integrated with a Chrome web extension for live URL scanning across web and mobile-compatible platforms
- Diagnosed and resolved 3 critical pipeline defects via systematic log analysis, restoring stable API performance across 100K+ URL samples
- Extracted 15+ features to classify malicious URLs, improving detection recall from 67% to 81%
- Achieved 88% ROC-AUC through model training and evaluation; validated via automated testing

Customer Segmentation & Clustering Analytics Platform | GITHUB

Python | PCA | Streamlit

- Processed 50K+ records, improving dataset reliability by 35% for downstream analysis
- Applied K-Means and Hierarchical clustering across 15+ features to identify four behavioral customer segments
- Optimized clustering performance by 30% using PCA with 95% variance retention
- Launched an interactive real-time web dashboard reducing manual analysis time by 60%

EDUCATION

M.Tech integrated in Software Engineering | Vellore institute of technology Amaravathi
CGPA: 7.46/10 | Relevant Coursework: Data Structures, Software Engineering

Sep 2022 – May 2026

ACHIEVEMENTS & CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle
- Postman API Fundamentals Student Expert — Postman
- GenAI Powered Data Analytics Job Simulation — Forage
